# ONLINE SEMINAR ON "THE IMPACT OF INDUSTRIAL IOT ON BUSINESS OPERATIONS AND THE MEASUREMENT MECHANISM"

## Seminar will be held on:

Friday, 24 June 2022  
10:00 am - 12:00 pm  
Via Zoom Webinar

## About the Seminar

The Internet of Things (IoT) has expanded in recent years, transforming our lives and the way we interact with our surroundings. It is connecting the universe and transforming physical objects around us into an ecosystem of information. While the consumer market continues to thrive with the emergence of wearable technology, and smart appliances and smart assistants in smart homes, market analysis has forecasted one of the top spendings on IoT solutions will be in manufacturing.

Dubbed the Industrial Internet of Things (IIoT), this focus of IoT in a manufacturing setting promises to radically transform the three fundamental pillars of the manufacturing process. The presentation will also cover Keysight 5C + 1C of IoT, which is the key enabler for a successful IoT ecosystems innovation.
